

Summer School

Barcelona

July 5th to 16th 2021

PERSONA CIENCIA EMPRESA
UNIVERSITAT RAMON LLULL

About

IQS offers a two weeks summer program, where students will have the opportunity to learn, discover and have fun in Barcelona. They will make new international friends and experience a unique way of life.

This program is designed to meet their needs and interests. That's why students can choose 2 or 3 modules among our offer and will therefore obtain 6 or 9 ECTS (transferable to their home university). But students will not only study as they will also visit companies. Social and cultural activities will be offered to make their time in Barcelona even better. In order to make things easier we provide them accommodation and help before and during their stay at IQS.

In case the evolution of COVID-19 Pandemia do not allow us to guarantee the security and health of students, Summer Program 2021 will adopt an online format, as we successfully did on 2020 edition.

Undergraduate and recent Graduates

Dates

July 5th to 16th 2021

Credits

6 or 9 ECTS

Language

English

Application deadline

May 31st 2021

Accommodation

Provided (optional)

Modules

Innovation & Entrepreneurship

In this crash-course on innovation and entrepreneurship students embark on a journey that takes them from a business idea to the development of a successful business plan.

Cross-cultural Management with a Global Perspective

A course to increase your effectiveness when interacting with people from other countries. At the end of the course you will be able to recognize, understand and take advantage of the most significant cultural differences in business and at the workplace.

A moral economy of sustainability & inequality

This course evaluates sustainability and social challenges from the perspective of a moral economy. It invites students to think morally about how individuals, companies and governments should approach the biggest challenges of our times such as climate change, degradation of ecosystem services, aporophobia, dismantling of welfare systems, the implications of artificial intelligence to labour markets and our social lives. It explores the links between people's moral sentiments and key social and economic institutions. This course examines the evidence behind key development issues from a moral perspective.
